On the above Spine Charts:-

- The light grey is the range of values in England at that geography
- The dark grey is the range of values in the middle 50% of values in England at that geography. Any values outside of this area are in the lowest or highest 25% of values.
- The figure for England is shown by the vertical black line
- The coloured dot shows where this geography is within England and the colours indicate significance compared to England (as described above and below the spine chart)
- Standardised Admission Ratio (SAR)/ Standardised Mortality Ratio (SMR) - Standardisation compares actual figures with expected figures if they followed the structure of that population e.g. age and gender.
- SAR/SMR Interpretation: - Figures over 100 are higher than expected and less than 100 are lower than expected. England is 100 because the England population structure is used in this data.
